SUMMARY

I am a B.Tech student specialized in front-end development, with hands-on experience in HTML, CSS and Javascript. Actively enhancing skills in modern frameworks like React. Eager to apply creative design and technical expertise to real world-projects in dynamic team.

PROJECT EXPERIENCE

Educnt

- Working with the wider development team
- Manage website design, content, gave a huge contribution
- Created a achievement page for the student details using HTML, CSS and JavaScript.

Portfolio

- Created a personal portfolio using HTML, CSS and JavaScript.
- The site highlights my expertise through a collection of projects, skills, and relevant experiences.
- The design is intuitive, making it easy for visitors to explore sections about my background.

Weather App

- Developed a responsive weather application using React for the frontend and Express for the backend.
 - Integrated APIs to fetch real-time weather data, enabling users to view current conditions and forecasts by location.
-
